

# How to be a Real Pendleton Booster

Pendleton's prosperity can be measured only by the success of its citizens. The success of its citizens grows in proportion to the number of dollars that are kept at work here. Dollars pay for labor. Industries grow and labor finds employment in proportion to the demand which each resident makes for

the products sold or made at home, but—it all depends on the number of dollars that are in circulation here at home.

Most of us have never had an opportunity to be of any real service to our home town. We are all willing enough. But we have not had the means to prove in actual deeds our

civic patriotism.

We know that each one of us can help our community and thereby help ourselves. Let's try it.

Little acts combined will soon accomplish big things. Pendleton will eventually become a big, busy and thriving city if every man,

woman and child will join us today in the resolve to begin now and continue persistently the policy of keeping their money in circulation here at home.

The dollar sent away stays away. The dollar spent at home goes right on serving this community so long as it stays here.

## THE PENDLETON MEAT CO.

Is an institution of local enterprise and local capital. The livestock from which its products are made are raised in this county and are healthy and wholesome. Their purchase price is left in the hands of farmers and stockmen who patronize Pendleton institutions. Pendletonians can carry out the campaign by always asking their butcher for PENDLETON MEAT CO. products and insisting on getting the famous "PEMECO" brand, sold in Pendleton by the following modern, clean and obliging markets:

### FRENCH DRAWING NEAR CHAULNES

GREAT ENCIRCLING NOOSE IS  
ADVANCED FROM WEST,  
NORTH AND SOUTHWEST.

City Is Important Support Point and  
Junction of Several Highways—Cap-  
ture Would Enable French to Dom-  
inate Surrounding Country.

(HENRY WOOD.)  
WITH THE FRENCH ARMY.  
SOUTH SOMME, Oct. 13.—The French  
draw an encircling noose from west,  
north and southwest and advanced  
their lines several points within a few  
hundred yards of the important town  
of Chaulnes.

The town was seriously menaced  
Tuesday, when the French captured  
German positions on a three mile  
front. The French are pocketing  
Chaulnes in the same manner the allies  
drove the Germans from Comblès.

Chaulnes is an important support  
point. The junction of several high  
ways. Its capture would enable the  
French to dominate the surrounding  
country for several miles. Aerial  
torpedoes, secretly dug trenches gave  
the French wonderful aid. Monday  
violated first line trenches at Denicourt,  
three miles northwest and observed  
preparations for the great attack  
Tuesday.

The French secretly dug a new  
trench paralleling the German posi-  
tions and reduced the width of the  
life zone, which the soldiers later  
crossed. New aerial torpedoes sys-  
tematically destroyed German wire en-  
tanglements. They launched tor-  
pedoes from little French mortars.

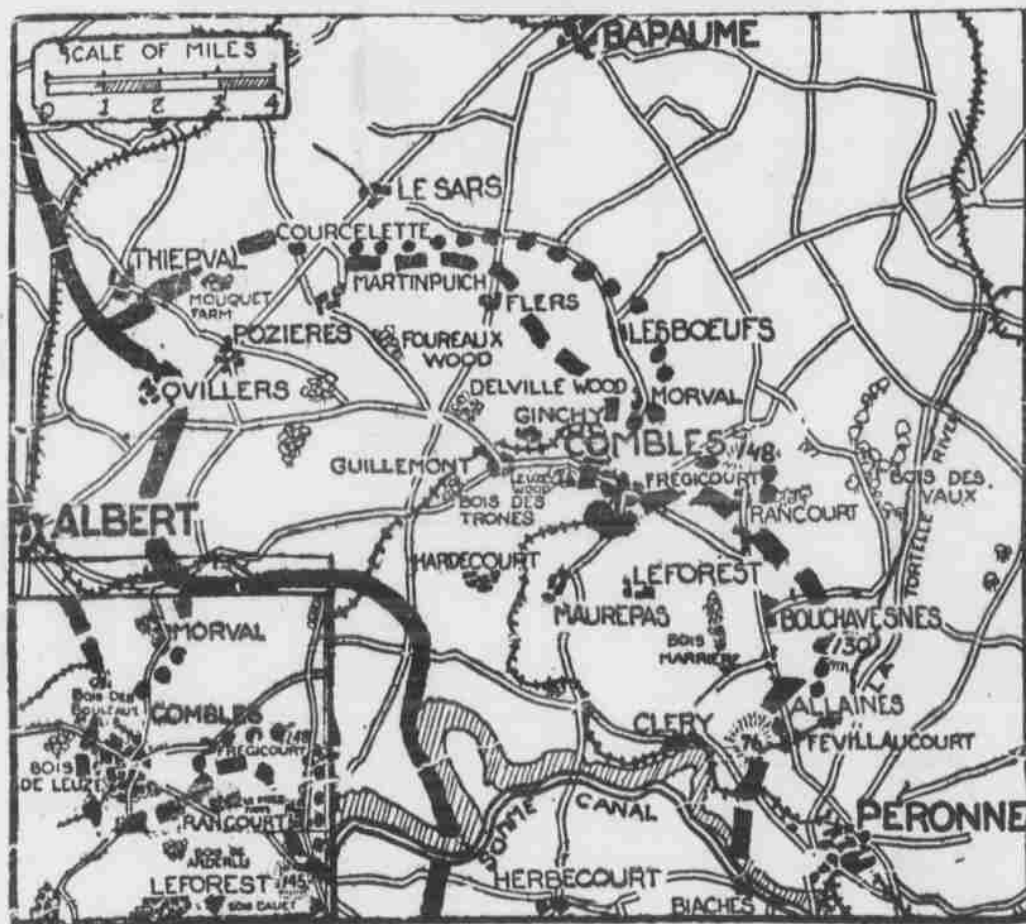

The torpedoes are noiseless. They  
described beautiful arches above the  
French line and darted with lightning  
rapidity into the German trenches.  
The havoc and destruction was great.  
French soldiers poked their heads  
above the parapets to watch the  
destruction although the German  
lines were only a hundred and fifty  
feet distant.

From the depth of a first line  
trench seventeen French sausage bal-  
loons and thirty observation aero-  
planes were observed directly above  
the French line. A squadron of  
smaller, faster aeroplanes protected  
the big machines. American volun-  
teers were assigned to this duty.

Only two German aviators appeared  
during the day. They seized mo-  
ments to direct machine guns on the  
French trench. German flyers con-  
sistently refused to fight French avi-  
ators. French soldiers said the con-  
stant presence of the aerial squad gave  
them a great feeling of security dur-  
ing the battle.

As we returned rearward, the Ger-  
mans launched a terrific barrage  
near Denicourt. The French did not  
leave the trenches until the following  
day.

### WHERE ALLIES HAVE MADE LATEST ADVANCES

This map shows how the combin-  
ed British and French assault upon  
Comblès resulted in gains for the al-  
lies. The broken line shows the ap-  
proximate position of the battle line  
before the assault began and the dot-  
ted lines indicate the extent of the  
gains in the first day's fighting.

French and British troops are now re-  
ported in Comblès. The insert may  
in the corner shows how the Germans  
were bottled up in the town.

**NEGROES INVADING LIVERPOOL.**  
They Come from Western Africa and  
America as Ship Workers.

LIVERPOOL, Oct. 13.—Liverpool  
is becoming conscious of a remarkable  
growth in its negro population. The  
negroes are coming from the west  
coast of Africa and from America, and  
generally are arrayed in garments of  
the latest cuts and hues. The color  
schemes usually are rather loud, the  
negroes from Africa wearing with those  
from the United States in a riot of  
checks, stripes, vivid neckties, lurid  
hose and bright yellow shoes.  
Most of the African negroes were  
recruited on the west coast to work

as firemen on steamers whose white  
crews presumably have become re-  
duced through the war. Many after  
trip have obtained employment here  
in the short-handed factories at lu-  
crative wages. Many American ne-  
groes have come over as muleteers  
or other workers on ships in the Amer-  
ican trade.

**WOULD PUT BEER ON CARD.**  
Eighty Thousand Germans Sign Peti-  
tion to Save Grain.

BERLIN, Oct. 13.—The newest  
suggestion for saving grain in Ger-  
many is offered by Dr. Bone of  
Klein-Flottbeck, who asks in a peti-  
tion to the imperial chancellor that  
a rule be passed whereby beer may  
be served only on presentation of a  
bread card. His plan is in effect to  
require all Germany to choose be-  
tween bread and beer as daily nour-  
ishment, instead of allowing an un-  
limited consumption of the latter. The  
petition is signed by some 80,000 per-  
sons.  
The petition declares that 42,000  
hundredweight of barley is used daily

### "CASCARETS" BEST IF HEADACHY, BILIOUS, SICK, CONSTIPATED

BEST FOR LIVER AND BOWELS,  
BAD BREATH, BAD COLDS,  
SOUR STOMACH.

Get a 10-cent box.  
Sick headache, biliousness, coated  
tongue, head and nose clogged, up  
with a cold—always trace this to tor-  
pid liver; delayed, fermenting food in  
the bowels, or sour gassy stomach.

Poisonous matter clogged in the in-  
testines, instead of being cast out of  
the system, is absorbed into the blood.  
When this poison reaches the delicate  
brain tissue it causes congestion  
and that dull, throbbing, sickening  
headache.

Cascarets immediately cleanse the  
stomach, remove the sour, undigested  
food and foul gases, take the excess  
bile from the liver and carry out all  
the constipated waste matter and poi-  
sons in the bowels.

A Cascaret tonight will surely  
straighten you out by morning. They  
work while you sleep—a 10-cent box  
from your druggist means your head  
clear, stomach sweet, breath right,  
complexion rosy and your liver and  
bowels regular for months.

to make beer, or sufficient to feed  
10,000,000 persons for one day. A  
liter of beer requires 250 grams of  
grain, whereas the average daily  
bread ration is but 250 grams. Dr.  
Bonne insists that barley is just as  
much a food as rye and white flour.

**BELIEVES KNUDSON WAS  
MISTAKEN FOR KINGSTON**

Admiral Cleaves Does Not Think  
Kingston Was Sunk—Searchers  
Ordered Home.

WASHINGTON, Oct. 12.—Admiral  
Cleaves informed the navy depart-  
ment he did not believe the German  
submarine sunk the steamer called  
the Kingston or Kingstonian. He be-  
lieved the name Knudson was mis-  
taken for Kingston. He thinks all  
survivors are accounted for and or-  
dered the destroyer squadron to re-  
turn to Newport.
